

VK KAPOOR

Applied AI Solutions Architect | AWS Certified Solutions Architect - Professional

Parker, CO | vk.kapoor@icloud.com | linkedin.com/in/vkapoor9

PROFESSIONAL SUMMARY

AWS-certified Solutions Architect and prolific AI builder with 20+ years across cloud architecture, enterprise migration, and IT leadership. Over the past year I have personally designed and shipped 30+ working tools and full applications end to end using Claude Code, and I build and release something new with AI almost every day outside of work. I pair deep AWS architecture with daily, practitioner-level fluency in LLMs, autonomous agents, agentic workflows, and AI-augmented development, and I am now extending into AWS's AI services. Currently leading multi-million-dollar AWS migrations at a global systems integrator. Known for turning complex technical decisions into clear outcomes and for teaching teams to adopt new tools.

AI PROJECTS & BUILDS

- **30+ applications shipped with Claude Code:** built 30+ working tools and full applications end to end using Claude Code over the past year, from first idea to running software, often within days.
- **Privacy-first, local-LLM apps:** built a personal AI assistant (Jarvis), a native macOS and cross-platform AI note-taking and meeting-recording app, and an AI homework-help app for children, all running entirely on local LLMs so no data leaves the device.
- **Cross-platform productivity software:** built a browser-based, AI-driven project management application with built-in AI chatbots, plus a live AI social-content SaaS and a voice-to-CRM tool, each built end to end with AI coding agents.
- **Custom AI agents & orchestration:** designed autonomous agents (including OpenClaw and Hermes) and multi-agent workflows using the BMAD framework to automate research, planning, and execution.
- **Automation pipelines & dashboards:** built daily automation and interactive dashboards for job discovery and scoring, market intelligence, and news briefings, plus mission-control dashboards for home infrastructure, powered by the Claude API.
- **AI-driven web & growth:** built AI-generated websites, conversational chatbots, AI-driven SEO and GEO (generative engine optimization) workflows, and games as hands-on experiments.
- **Homelab infrastructure:** operate a Proxmox VE homelab (Docker, TrueNAS, NGINX, Home Assistant, Tailscale) run like a private cloud for safe experimentation before anything reaches production.

KEY SKILLS

AI & GenAI: LLM Application Architecture, Prompt Engineering, Autonomous AI Agents, Agentic Workflows & Multi-Agent Orchestration (BMAD), AI-Augmented Development (Claude Code, GitHub Copilot), OpenAI / GPT Models, Local LLMs (Ollama), AI Workflow Automation; exploring Amazon Bedrock & Amazon Q

Cloud Architecture & Migration: AWS (EC2, S3, RDS, Aurora, VPC, Direct Connect, CloudFront, ALB/NLB, Auto Scaling, Organizations, Control Tower), Azure, Multi-Cloud, Hybrid Cloud, GovCloud, Well-Architected Framework

DevOps & IaC: Terraform, CloudFormation, Ansible (architecture & review), Git, CI/CD pipeline design

Security: IAM, Security Hub, AWS Config, Secrets Manager, Systems Manager, DISA STIG, SCAP, Zero Trust Architecture

Containers & Virtualization: Docker, Proxmox VE, VMware; Solution Design: Kubernetes, EKS, ECS, Fargate

FinOps & Tooling: Cost Explorer, Trusted Advisor, CloudWatch, CloudTrail; Python and SQL (AI-assisted), YAML, JSON, Jira, Confluence, ServiceNow

PROFESSIONAL EXPERIENCE

Engineering Manager II | Deloitte Consulting LLP | Denver, CO

Jan 2019 - Present

Lead Cloud Architect - State Driver-Services System Migration (State Government), 2025 - Present

- Leading the migration of a mission-critical state system serving millions of residents to AWS, designing end-to-end Well-Architected infrastructure (EC2, RDS, S3, VPC, IAM, CloudWatch) with AI-driven project management and application modernization.
- Leading cross-functional Agile engineering teams; defining DevSecOps requirements including STIG scanning and Security Hub integration across all environments.

Deputy Cloud Architect - State Health & Human Services System Migration, 2023 - 2024

- Designed high-availability infrastructure (EC2, RDS, VPC, Transit Gateway, ALB/NLB, Auto Scaling) on the AWS Well-Architected Framework; drove FinOps optimization achieving ~50% cost reduction (\$760K/yr).
- Led the unstructured data migration workstream with hands-on NetApp ONTAP CLI administration (SnapMirror) into AWS FSx for NetApp ONTAP and EFS.

Cloud Solutions Architect - Federal Agency, FedRAMP-Authorized GovCloud, 2021 - 2023

- Architected compute, storage, networking, and migration solutions including Route 53 and multi-tier VPCs; defined reusable IaC patterns and automated SCAP/STIG compliance scanning, maintaining continuous ATO readiness.

Sr. Technical Consultant / Manager | Larsen & Toubro Infotech | Denver, CO*Oct 2014 - Jan 2019*

- Initiated and delivered a custom mobile app for asset/work management, saving the client \$300K/year in licensing costs; supervised development teams across requirements, design, QA, and deployment.
- Executed a full-stack enterprise platform upgrade including database migration (SQL Server 2008 to 2016), IBM WebSphere upgrade, and horizontal/vertical cluster scaling.

Earlier Experience | IBM, MRO Software, and others | Bedford, MA & Denver, CO*2003 - 2014*

- Progressive engineering and technical support roles spanning enterprise asset management, application servers (WebSphere, WebLogic), databases (Oracle, SQL Server, DB2), and systems administration.

CERTIFICATIONS & EDUCATION

AWS Solutions Architect - Professional | AWS Security - Specialty | Azure Fundamentals (AZ-900) | PMP

MBA - Karnataka State Open University, India, 2011 | B.Sc. Computer Science - UMass Lowell, USA, 2005
